Creating efficient modular bathroom pod solution

Our head office and manufacturing facility are based in Gdansk, Poland.

We make custom bathroom pods for each project, matching the size and type to what the client wants, while keeping the quality high and consistent.

Our bathroom pods offer several benefits for projects that need a large number of standard bathrooms, like residential buildings and hotels.

Each finished pod is tested, quality-checked, and cleaned before being delivered to the site, ready for easy installation. This saves the main contractor time and ensures consistent quality in the construction process.

How we work

GETTING IN CONTACT Our multilingual staff is always at your disposal. You can contact us by phone, e-mail.

PREPARING IN OFFER We adapt bathroom pod designs to your requirements.

MOCK-UP APPROVAL Client approves sample before full production begins.

REALIZATION

Once all the transaction conditions are set, the production process starts. All the bathroom pods are manufactured in Gexan's production hall. You may check the realization of your project at any stage of the production - you will be continuously informed by our staff about the progress or you can visit the plant personally.

DELIVERY

We provide delivery to your specified location, ensuring timely arrival aligned with the construction schedule.

What is a bathroom pod?

Gexan modular bathroom pods are **fully equipped bathroom units manufactured in a factory setting**, with all mechanical, electrical, and plumbing infrastructure completed. Delivered ready for connection, they simplify construction processes by enabling fast installation, ensuring high quality, and maximizing efficiency.

WALL STRUCTURE

Steel construction (75 mm)
Plasterboard (12.5 mm)
Waterproof sealing tape featuring a double layer of sealing compound
Ceramic tile with adhesive (10 mm)

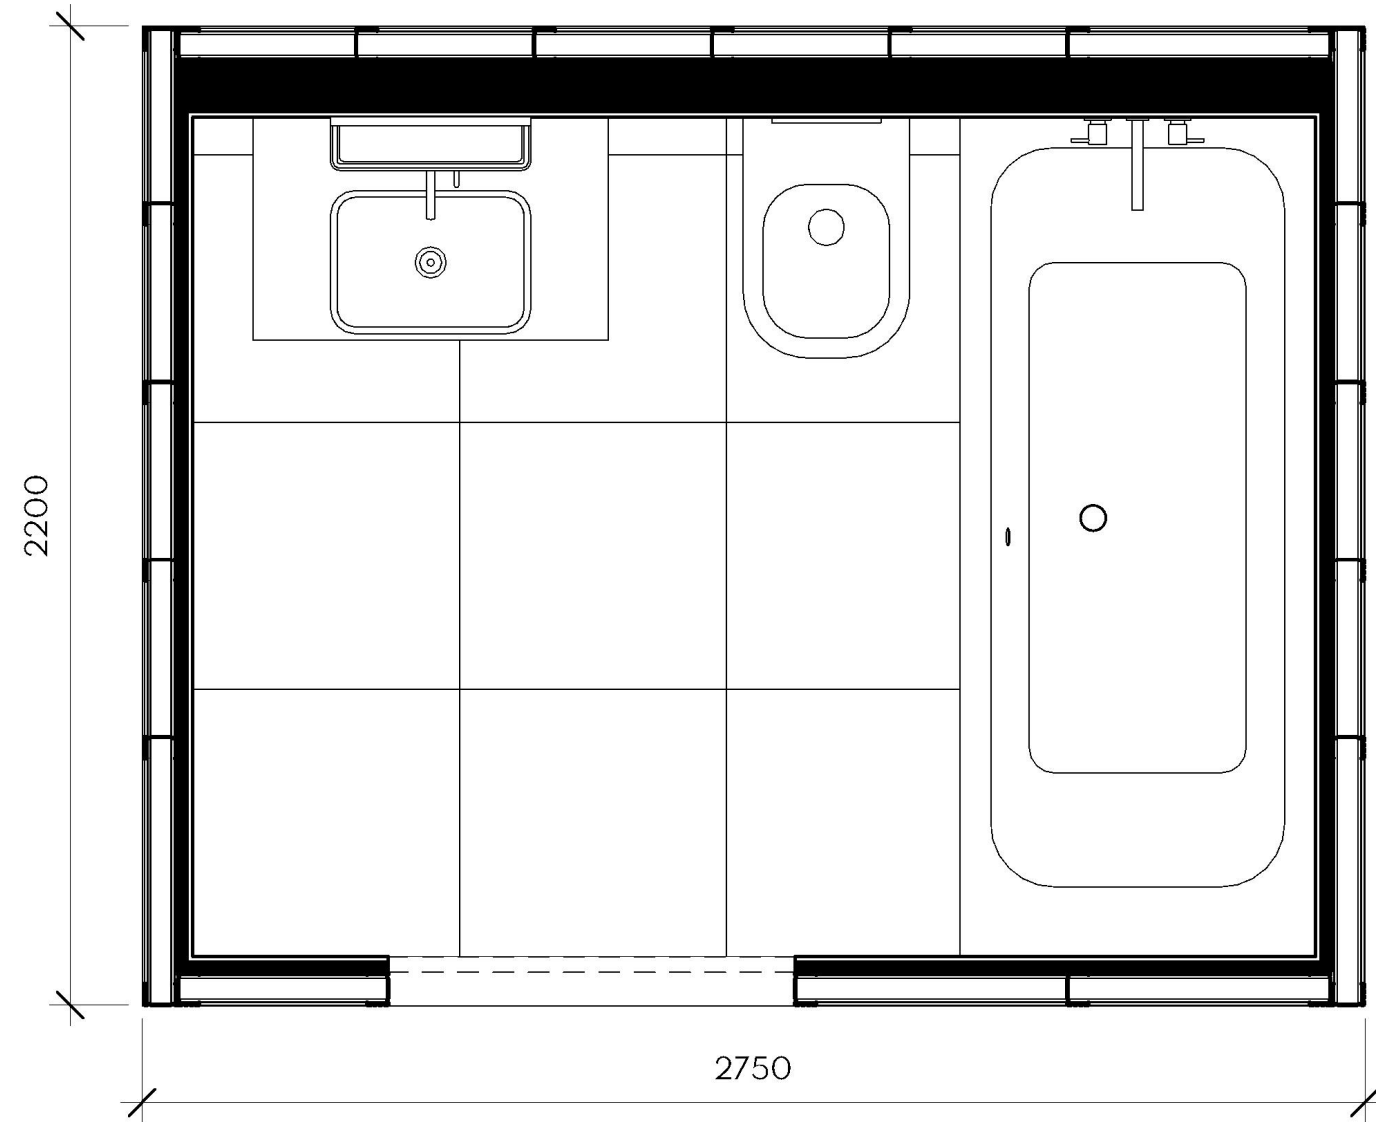

FLOOR STRUCTURE

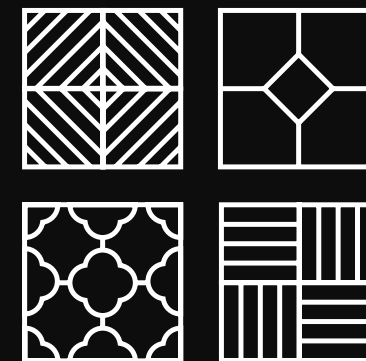

Steel construction (75 mm)
Steel sheet (3mm)
Ceramic tile with adhesive (10 mm)

CEILING

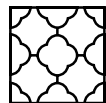

Steel construction (40 mm)
Plasterboard (12.5 mm)
Liquid membrane (vapor barrier)

Sample bathroom layout
